-- Total Revenue Measure
Total Revenue =
SUM(Sales[Revenue])

-- Last 12 Months Filter Table (Optional)
Last12Months =
DATESINPERIOD(
 'Date'[Date],
 MAX('Date'[Date]),
 -12,
 MONTH
)

-- 12-Month Revenue Measure
Total Revenue (12M) =
CALCULATE(
 [Total Revenue],
 DATESINPERIOD(
 'Date'[Date],
 MAX('Date'[Date]),
 -12,
 MONTH
)
)

Build the Line Chart in Microsoft Power BI

1. Insert a Line chart visual.
2. Drag 'Date'[Month Year] to the X-Axis.
3. Drag [Total Revenue (12M)] to Values.
4. Sort the chart by 'Date'[Date] ascending.
5. In Filters:
Select the Date field.
Apply Relative Date Filtering:
is in the last 12 months
6. Format:
X-axis → Continuous

Turn on Data labels

Add chart title:

12-Month Revenue Trend

```

Example README.md

12-Month Revenue Trend Dashboard

This Power BI report visualizes Total Revenue over the last 12 months using a time-series line chart.

Features

- Dynamic 12-month rolling window
- DAX revenue measures
- Relative date filtering
- Continuous time-series visualization

Tools

- Power BI
- DAX

Measure Used

```
``DAX
Total Revenue =
SUM(Sales[Revenue])
```

GitHub Upload Steps

1. Create a new repository on .
2. Upload:
 - `.pbix` file
 - DAX scripts
 - screenshots
 - README.md
3. Commit changes with message:

```
``bash
git commit -m "Added 12-month revenue time-series line chart"
```

4. Push repository:

```
git push origin main
```
